### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1 and 7 are rejected under 35 U.S.C. 102(e) as being anticipated by Fernandez et al. U.S. Patent 6,695,707.

Fernandez et al disclosed an amusement ramp comprising a deck member (62) having at least one leg (36); a curved rail (20) (see Fig. 3) attached to the deck member; a curved ramp member (12) hingedly connected to the curved rail to form a load bearing angular relationship with respect to the curved rail for supporting both lateral and gravitational force on the curved ramp member; at least one of the legs (36) is angled away from the curved ramp member as shown in Fig. 1.

***Claim Rejections - 35 USC § 103***

Art Unit: 3712

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fernandez et al ('707).

It is noted that Fernandez et al failed to specifically disclose the dimension of the radius of curvature of the ramp member. However, such dimension appears to be a matter of design choice to accommodate any specific environment and/or user. Accordingly, it would have been a matter of design to one skilled in the art at the time of the invention to manufacture the curved ramp member of Fernandez et al with any desired dimension for the reason as set forth above.

Claims 3-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fernandez et al in view of Allen U.S. Patent 6,430,769.

Fernandez et al also disclosed in Fig. 3 a sheet member (12) covered a frame. However, Fernandez et al failed to teach the curved ramp member having a plurality of sections attached to each other using hinges as set forth in these claims. However, Allen teaches a ramp having a plurality of sections (22, 24) connected to each other by hinges (26) for the purpose of folding the ramp sections in order for the convenience of carrying and transportation. Therefore, it would have been obvious to one of ordinary skill in the art to modify the curved ramp member of Fernandez et al with the foldable sections as taught by Allen for the reason as set forth above.

Art Unit: 3712

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The enclosed references show various types of foldable ramp sections.
